FUND MANAGEMENT

INTRODUCTION

Investment portfolios are becoming more complex, and there are more financial products available for trade. In addition, emerging markets throughout the world are providing new investment opportunities, which require expertise in geographic regions where those markets are located.

According to US Department of Labour the Employment of financial analysts is projected to grow 16 percent YOY from 2012 to 2022, faster than the average for all occupations. A growing range of financial products and the need for in-depth knowledge of geographic regions are expected to lead to strong employment growth.

The continued implementation of financial regulatory reform could constrict growth in the industry, as rule-making bodies place a greater emphasis on stability. Restrictions on trading by banks may shift employment of financial analysts from investment banks to hedge funds and private equity groups.

AFA® Certification has been extensively remodelled for India and is designed to equip you with skills and expertise to take Financial Analysis activities to the next level of professionalism as required by the industry.

FINANCIAL ANALYST

Financial analysts, also known as securities analysts or investment analysts, analyze and provide guidance to businesses regarding investment opportunities. They help companies and non-profit institutions, including universities with large endowments, develop investment strategies that will yield a profitable return.

WHAT FINANCIAL ANALYSTS DO ?

Financial Analysts conduct quantitative analyses of information affecting investment programs of public or private institutions. They assess the performance of stocks, bonds, and other types of investments. Thus they provide guidance to businesses and individuals making investment decisions.

Financial analysts use spreadsheet and statistical software packages to analyze financial data, spot trends, create portfolios, and develop forecasts. Analysts also use the data they find to measure the financial risks associated with making a particular investment decision. On the basis of their results, they recommend whether to buy, hold, or sell particular investments.

AMERICAN ACADEMY OF FINANCIAL MANAGEMENT® (AAFM®, USA)

GROWTH IN FINANCIAL ANALYSIS INDUSTRY

According to the BLS, 250,600 financial analysts were employed in 2008. With the expected growth rate of 20% or higher, there will be an additional 49,600 new jobs for analysts from 2008-2018, an employment total of 300,300.

The industries that employed the most financial analysts in 2012 were as follows:

Securities, commodity contracts, and other financial investments and related activities	21%
Credit intermediation and related activities	13
Professional, scientific, and technical services	13
Management of companies and enterprises	12
Insurance carriers and related activities	8

According to the Bureau of Labor Statistics, financial analyst positions are expected to grow by 15.5 percent, or 39,300 jobs, between 2012 and 2022, much faster than the average for all professions. But competition for these jobs is fierce, especially among analysts new to the field. Financial analysts earned a median of \$76,950 in 2012, with the lowest-paid making \$47,130 and the highest-paid making \$148,430.

CAREER PROSPECTS

Portfolio managers supervise a team of analysts and select the mix of products, industries, and regions for their company's investment portfolio. These managers not only are responsible for the overall portfolio, but also are expected to explain investment decisions and strategies in meetings with investors.

Fund managers work exclusively with hedge funds or mutual funds. Both fund and portfolio managers frequently make split-second buy or sell decisions in reaction to quickly changing market conditions.

Ratings analysts evaluate the ability of companies or governments to pay their debts, including bonds. On the basis of their evaluation, a management team rates the risk of a company or government not being able to repay its bonds.

Risk analysts evaluate the risk in investment decisions and determine how to manage unpredictability and limit potential losses. This job is carried out by making investment decisions such as selecting dissimilar stocks or having a combination of stocks, bonds, and mutual funds in a portfolio.

Some of the Designations which AFA® Designation Holder works at:

- ✓ Corporate Financial Analyst
- ✓ Investment/Securities Analyst
- ✓ Financial Analyst
- ✓ Equity Analyst
- ✓ Senior Financial Analyst
- ✓ Portfolio Managers
- ✓ Fund Managers
- ✓ Chief Financial Officer
